PROFESSIONAL PROFILE

Full Stack Developer and QA Automation Engineer specializing in ensuring the quality of critical enterprise platforms and building modern software architectures. Proven commercial experience in API and performance test automation for retail leaders such as El Corte Inglés and Mango. Strong command of backend (Java, .NET C#, ASP.NET Core) and frontend (Angular, React, Vue.js) technologies. Highly oriented towards efficiency through agile methodologies, advanced CI/CD pipelines, and the deployment of scalable Cloud-backed solutions (AWS, Azure).

PROFESSIONAL EXPERIENCE

QA Automation Engineer – Tantin Solutions *Madrid, Spain | May 2026 – Aug 2026*

- **Unity Microservices (El Corte Inglés):** Developed and maintained automated API regression testing using Karate DSL to validate critical logistics flows for stock availability, catalog updates, reservations, and supply chain operations.
- **Mango POS (Point of Sale):** Actively collaborated in the functional validation of the POS desktop application based on .NET C#, MAUI, and CQRS/MediatR architecture. Maintained code quality standards by establishing strict metrics in SonarQube.
- **Performance Testing:** Planned and executed load, stress, and spike simulations using JMeter and Gatling (Java DSL), identifying and resolving bottlenecks in high-transaction environments.
- **Advanced CI/CD:** Designed, automated, and maintained daily regression pipelines in Jenkins utilizing Groovy scripts, successfully integrating them into GitLab-based source control pipelines.

QA Automation Intern – Tantin Solutions *Madrid, Spain | Mar 2026 – May 2026*

- Designed and executed test plans and automation scripts with Karate DSL for corporate projects belonging to real-world clients under senior supervision.
- Successfully integrated into agile methodologies (Scrum) and managed tasks through corporate defect management tools (Jira).

Front-end Developer (Volunteer) – Club Voleibol Aranjuez *Madrid, Spain | Apr 2025 – May 2025*

- Designed, developed, and launched the club's official website utilizing HTML5, CSS3, and vanilla JavaScript.
- Optimized mobile responsiveness and resolved usability and performance friction points utilizing browser DevTools.

HIGHLIGHTED PROJECTS

- **Simpleat (Automation & Performance):** Comprehensive decoupled architecture design for End-to-End (E2E), API, and performance automated regression of this SaaS platform. Implemented utilizing Playwright, Cucumber (BDD), Karate DSL, Gatling 3.10, and GitHub Actions.
- **ATLAS SaaS:** Testing and continuous maintenance of a modular backend monolith and reactive frontend for an intelligent quality analysis platform. Built leveraging Java 21, Spring Boot, Spring Modulith, PostgreSQL, and Angular 20.

EDUCATION & CERTIFICATIONS

Master in Full Stack Development & Cloud Architectures – Tajamar Tech *Madrid, Spain | Oct 2026 – Jun 2027*

- **Frontend Stack:** Angular, React, Vue.js.
- **Backend & Data:** C#, ASP.NET Core, Entity Framework Core, SQL Server.
- **Cloud & Enterprise:** AWS (DVA-C02), Microsoft Azure (AZ-204), Microsoft Power Platform (PL-400).
- **Targeted Certifications (2027):** GitHub Certified: Agentic AI Developer (GH-600).
